

PRIORITY DATA

This application claims the benefit of U.S. Provisional Application No. 60/409,854 filed Sept. 11, 2002.

Claims

What we claim is:

1. A method for the treatment of human papillomavirus (HPV)-induced tumors in a mammal, said method comprising the topical application of hydrogen peroxide to said mammal.
2. The method according to claim 1 wherein said (HPV)-induced tumor is selected from the group consisting of verrucae warts, plantar warts, flat warts and genital warts
3. The method according to claim 1 wherein said active ingredient is peroxide.
4. The method according to claim 3 wherein said peroxide is in admixture with a pharmaceutically acceptable carrier or excipient.
5. The method according to claim 1 wherein said hydrogen peroxide is in admixture with a pharmaceutically acceptable carrier or excipient.
6. A method for the treatment of genital warts, and treatment of human papillomavirus (HPV) from the female genital tract in infected females comprising the application of a gel comprising hydrogen peroxide.
